Part 1: Detailed Findings & Recommendations

An end-to-end user and developer analysis was conducted on <https://www.naikfoods.co.in/in>. Below are the key identified defects, business impacts, and technical solutions.

1. Broken Analytics & Tracking Pipeline Observation: In the legacy <code><head></code>, Google Tag Manager script preloads with an undefined ID: <pre><link rel="preload" href="https://www.googletagmanager.com/gtag/js?id=undefined" as="script"/></pre> Technical & UX Impact: Complete failure of marketing attribution. Pageviews, add-to-cart, and checkout analytics fail silently. Rebuilt Solution: Implemented an environment variable guard in Next.js layout that validates GTM/GA regex (<code>G-[A-Z0-9]+</code>) before injecting script tags, eliminating console errors.	CRITICAL
2. Character Encoding (Mojibake) Corruption Observation: Non-ASCII characters (em-dashes, apostrophes, ellipsis) render as the broken replacement character <code><?></code> throughout product descriptions and search inputs (e.g. <i>Search products<?></i>). Technical & UX Impact: Signals a broken, untrustworthy storefront to buyers, degrading conversion rates. Rebuilt Solution: Standardized database collation to <code>utf8mb4</code> and implemented string sanitizers that normalize typography across all routes.	HIGH
3. Semantic Headings & SEO Failures Observation: Every single product page hardcoded the primary <code><h1></code> as <code><h1>Product Details</h1></code>. Blog posts hardcoded <code><h1>Blog Details</h1></code>. Page titles contained duplicate suffixes: <i>Naik Foods ... Naik Foods</i>. Technical & UX Impact: Search engines cannot discern individual products, causing organic search traffic to crater. Rebuilt Solution: Dynamic <code><h1></code> matching exact product and recipe titles, clean 160-char meta descriptions, and rich <code>schema.org/Product</code> JSON-LD structured data.	HIGH
4. Food Safety & Regulatory Non-Compliance (FSSAI) Observation: Naik Foods sells seafood items (<i>Kolambi Lonche / Prawn Pickle</i>) alongside vegetarian masalas, yet zero green/red Veg dots or 14-digit FSSAI licenses were displayed. Technical & UX Impact: Violation of Indian FSSAI food e-commerce mandates; severe friction for vegetarian shoppers. Rebuilt Solution: Official FSSAI Central License (11521036000428) prominently displayed, green/red dietary dots on every card, and 100g nutritional facts panel.	HIGH (LEGAL)
5. WCAG 2.1 Accessibility & Viewport Lock Violation Observation: Mobile viewport explicitly locked pinch-to-zoom: <code>user-scalable=no</code>, <code>maximum-scale=1</code>. Brand green <code>#70BF4F</code> on white yielded only 2.4:1 contrast ratio.	MEDIUM

Technical & UX Impact: Fails WCAG 2.1 Success Criterion 1.4.4 (Resize Text). Elderly users cannot zoom into ingredient labels.

Rebuilt Solution: Removed zoom locks (`maximum-scale=5`) and upgraded brand green to #4E8E3C for WCAG AA 4.5:1 contrast compliance.

6. Product Catalog Brand Dilution

MEDIUM

Observation: A heritage brand founded in 1938 was listing industrial supermarket goods: Nestlé Maggi, Sunfeast Yippee noodles, and Knorr soup packets.

Technical & UX Impact: Destroys premium culinary credibility when users see commodities available in 10 minutes on quick-commerce apps.

Rebuilt Solution: Delisted mass FMCG; focused 100% on rare regional artisanal treasures: Vidarbha Sauji, Ambadi Lonche, Konkan Kokum Agal, Pune Shrewsbury Cookies, and Hurda Bhajni.

Part 2: Comparison Scorecard & Development Deliverables

Audit Dimension	Legacy Live Website (naikfoods.co.in)	Rebuilt Platform (naik- foods.vercel.app)	Status
Shared JavaScript Bundle	433 KB across 45 separate scripts	103 kB (76% reduction in payload)	✔ Optimized
Routes & Pre-rendering	Incomplete client-side flight payloads	40 / 40 routes pre-rendered (SSG + Dynamic)	✔ 100% Validated
Database Architecture	Static hardcoded arrays / No cloud DB	Live MongoDB Atlas Cloud + Dual-Layer Cache	✔ Production DB
Product Management	Requires manual code edits and commits	No-Code Visual Admin Portal (/admin)	✔ Fully Visual
Language Support	English only	Bilingual English & मराठी (Instant toggle)	✔ Cultural Moat
Video Experience	Zero video media	Shoppable Video Reels & Recipe Masterclasses	✔ High Engagement
Free Shipping Threshold	₹999 (High barrier for ₹40 items)	₹499 (Dynamic free shipping progress bar)	✔ High Conversion
FSSAI & Regulatory	License missing, no Veg/Non-Veg dots	Lic. 11521036000428 + Official safety badges	✔ Compliant
Pincode Delivery Check	None	Live 6-digit Indian Pincode Estimator	✔ Real-Time

SHOPPER CONVERSION & 1-CLICK SHOPPABLE RECIPE FLOWCHART

Part 3: Visual Evidence & Live Implementation Proof

Figure 1: Legacy Website (Broken GTM id=undefined, Mojibake characters, missing dietary safety dots)

Figure 2: Rebuilt Hero (FSSAI Lic. 11521036000428, Watch Heritage Video button, Bilingual switch)

Figure 3: Instant Marathi Toggle (अस्सल विदर्भ सावजी मसाला, पिशवीत टाका, अस्सल महाराष्ट्रीयन चव)

Figure 4: Regional Explorer (Interactive geography of Vidarbha, Konkan, Pune, Marathwada)

Figure 5: Shoppable Culinary Video Reels (Stone-grinding Sauji, curing Ambadi, pounding Kolhapuri Thecha)

Figure 6: Curated Store Catalog (100% regional delicacies, Veg/Non-Veg indicators, dynamic price filters)

Figure 7: Recipe Detail Page (Embedded video cooking walkthrough & 1-Click "Add All Ingredients" button)

Figure 8: Visual Admin Portal (/admin with quick metrics, stock toggles, and live inventory control)

Figure 9: No-Code Product Creator (/admin/products/new with image presets, Marathi inputs, nutrition table, and instant live sync to MongoDB Atlas)

Part 4: Conclusion & Operational Readiness

The rebuilt **Naik Foods** platform represents an end-to-end, production-ready transformation. By combining a **modern Next.js 15 SSR/SSG engine**, **MongoDB Atlas cloud persistence**, **shoppable culinary video media**, and a **zero-code visual Admin Portal**, the platform delivers enterprise-grade performance while celebrating authentic Maharashtrian cultural heritage.

Verification Summary:

- Live Production URL: <https://naik-foods.vercel.app/>

- **GitHub Repository:** <https://github.com/veerasatyam/Naik-foods>
- **Cloud Database:** MongoDB Atlas Cluster backend.v1khhhz.mongodb.net (Database: naikfoods)
- **Admin Demo Login:** satyamsvs788@gmail.com (Shortcut button on /login)
- **Build Validation:** 40 / 40 routes pre-rendered with zero errors (103 kB shared bundle).
